

Heat-Keeper radiator panels

It is well worth spending extra on the more professional reflector foils such as Heat-keeper. If you have radiators on outside walls, much of heat from the radiator will be lost through the wall, even if the wall is insulated. Heat-keeper radiator panels can be easily fitted behind the radiators to radiate and convect the heat back into the room. They are very effective and independent tests show that they can reduce heat cost and CO₂ emissions by between 8 – 20 % depending on wall type/insulation (for if all radiators are on external walls) giving a payback of between 6 – 24 months for each radiator with panels fitted.

These can be bought from the Green & Easy website at <http://www.greenandeasy.co.uk/categories/Log-Stores-and-Accessories.aspx> or direct from the manufacturers at <http://www.heatkeeper.co.uk/index.html>

Banchory Energy Reduction Initiative (B.E.R.I.) is a local community organisation funded by the Scottish government's Climate Challenge Fund until March 2012 and run by part time staff and volunteers. Online information at www.banchory.org see link to community projects. For more information tel 077 697 125 20 e mail beri.banchory@hotmail.co.uk Drop in advice sessions at Banchory Town Hall Mondays and Fridays 10.30 – 12.30
